

Residential Care Facilities Quick Facts Directory

2017

About this Directory

The Residential Care Quick Facts Directory lists information for 292 publicly subsidized facilities in British Columbia that offer residential care services to seniors. It is designed to be a starting point for seniors and their care givers to find reliable data on residential care facilities in the province.

To ensure personal privacy of residents is protected, the Directory has suppressed some data for facilities with small (usually less than 5) residents. This is the same standard used by the Canadian Institute for Health Information.

The information in the Directory will be refreshed at least each year. It will also be refreshed if a facility reports a material change in their information. If readers have a question about the data sources, they can contact the Office of the Seniors Advocate directly at 1.877.952.3181. If there is a question specific to a particular facility, readers are encouraged to contact the facility directly.

About our Data Sources

Data included in this report were gathered primarily from residential care facilities, health authorities, the Ministry of Health, and the Canadian Institute of Health Information (CIHI).

Information regarding licensing incidents and complaints reflects the 2015-16 fiscal year, while licensing inspection data was a snapshot taken on December 7, 2016. Each health authority makes inspection reports publicly available on its licensing webpage, which is updated regularly. To see the most recent inspection information, please visit:

Interior Health:

http://www.interiorhealth.ca/YourEnvironment/InspectionReports/Pages/default.aspx

Fraser Health:

Glossary

When looking at the information and comparing facilities it is important to understand terms that may not be familiar to you as well as the data that an indicator represents. The following glossary provides information on key indicators displayed in the directory.

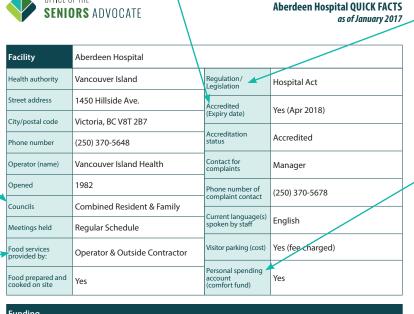

Accreditation – Some care facilities are voluntarily accredited. Accreditation is an ongoing audit process to identify where facilities do well, and where they can make improvements. Peer reviewers visit the organization every four years to evaluate the extent to which it is meeting standards and assigns a rating.

OFFICE OF THE

Councils – A facility may have a family and/or resident council. The council is a group of individuals who either live in the facility or are the representative or relative of residents. They meet to discuss issues of importance to residents.

Food – Food may be provided by either the operator of the facility or a contractor and could be prepared either offsite and re-heated on-site, or cooked on-site.

Beds – Private beds are not subsidized and may or may not be available at the facility (call facility to find out); publicly funded beds may be short-term (respite, palliative, rehabilitation) or long-term (intended for permanent residents that require 24 hour complex care).

Funding	
Funded nursing care hours per resident per day	2.91
Funded Allied Health hours per resident per day	0.36
Total 2014/15 funded direct care hours per resident per day	3.27
Source: Health Authority	
Beds & Rooms	

Beds &	eds & Rooms				
Beds*		Quantity	Room Configuration**	Quantity	
Private b	eds (not publicly funded)	0	Private rooms	19	
Publicly f	unded beds (short- and long-term)	100	Semi-private rooms	4	
Total bed	s	100	Multi-person rooms	25	
Source: *	Ministry of Health; ** Facility				

Rooms – Semi-private rooms are shared by two residents; multi-person rooms are shared by three or more residents.

Legislation – Residential care facilities are governed by either the Community Care and Assisted Living Act (CCALA) or the Hospital Act and their respective regulations.

Personal spending account (comfort fund) –

Residents and their families can deposit up to \$500 to this account from which the resident can make cash-free purchases of items not covered in their monthly client rate, such as a haircut or group outing.

Direct care hours – This statistic reflects the number of hours of care services that Health Authorities fund each facility per resident, per day. It does not include hospitality services such as meals, laundry, or housekeeping. Nursing hours include Registered Nurses, Licensed Practical Nurses and Residential Care Aides. Allied Health includes physical, occupational, recreation, speech and language therapies, social work services and dieticians. The care hours reported represent an average number for the entire facility, not how many hours of care each resident receives. The decision to fund care hours is made by the health authority and not by the individual facility.

Licensing Inspection – Licensing Officers inspect facilities to verify that they are complying with the standards and requirements outlined in the Community Care and Assisted Living Act.

There are several licensing inspection types and purposes, including routine inspections conducted on a semi-regular basis, an inspection following a complaint, a non-visit follow-up that could be conducted by phone to ensure a required change has been made, or to monitor compliance with licensing standards.

Licensing Complaint – A formal complaint to the facility's health authority regarding a perceived violation of the licensing regulation. Licensing Officers inspect the facility to determine if the complaint is substantiated – that is, if the facility was not in compliance with the licensing regulation.

Physical, recreational and occupational therapy – Facilities are required to report, through regular health assessments of individuals, whether a resident received various types of therapies from a qualified therapist, or their supervised therapy assistant, for at least 15 minutes, in the last 7 days prior to the assessment date. Assessments are done using the InterRAI Resident Assessment Instrument 2.0. Occupational and physiotherapy may not be required for every resident in a facility but the calculation is based on the total number of residents regardless of who needs these therapies. Reported recreation therapy must be beyond the usual activities programming provided by a facility and be provided by a qualified therapist (or an assistant under their supervision) and include measureable objectives and progress evaluations.

Depression and depression medication – Percent of all residents diagnosed with depression and the percent of residents taking antidepressants.

Taken antipsychotics without a diagnosis of psychosis – Indicates that a resident was given an antipsychotic medication for a purpose other than for its approved use to manage psychosis. These drugs are sometimes used to manage behaviours in residents, for example dementia, anxiety or agitation.

Daily physical restraints – Indicates the daily use of physical restraint, which includes limb and trunk restraints and use of a reclining chair from which a resident cannot rise. CIHI states that, "Restraints are sometimes used to manage behaviours or to prevent falls. There are many potential physical and psychological risks associated with applying physical restraints to older adults, and such use raises concerns about safety and quality of care."

Incident – Licensed facilities governed by the *Community Care and Assisted Living Act (CCALA)* are required to report incidents as defined under the Residential Care Regulation. This Directory includes incident types which have been reported to health authority licensing offices for the 2015/16 fiscal year. All health authorities, except Island Health are now reporting on the same incidents for *Hospital Act* facilities.

Serious Adverse Event – Facilities governed by the *Hospital Act* also define incidents in one broad category: "serious adverse events". A serious adverse event is an incident which was not expected or intended to occur, was not caused by or related to an underlying medical condition of a patient or was the likely cause of, or likely contributed to, severe harm to or the death of a patient. As Island Health does not require *Hospital Act* facilities to report on the same incidents as CCALA sites, serious adverse events are used for facilities within Island Health in the directory.

Link to web page

http://www.viha.ca/hcc/residential/locations/acacia_ty_mawr.htm

Facility Fees – The Directory highlights where additional costs are charged by facilities. Provincial policy indicates the cost of receiving subsidized residential care services in B.C. is calculated at 80% of an individual's after tax income, subject to a minimum and maximum amount. Temporary rate reductions are available for people in financial need.

Other Fees – Preferred personal hygiene and grooming supplies not included in the monthly client rate, such as special denture cleaner, soap or facial tissues that are different from what the facility provides. General hygiene supplies such as shampoo, incontinence supplies and toilet paper are included in the client rate.
