B.C. Seniors Demographics

Population

- ◆ In 2018, there were **912,725 seniors** in B.C.
- ◆ The **seniors population** grew by 4% in 2018 and seniors now represent 18% of the population compared to 14% in 2008.
- ◆ From 2008-2018 the proportion of the population 75-84 and 85 plus has remained relatively stable at 5% and 2% respectively.
- ◆ The distribution of seniors is not proportionate throughout the province. The percentage of seniors ranges from a high of 24% on Vancouver Island to a low of 13% in Northern Health.

Healthcare Highlights

General

- ◆ The **seniors population** is generally healthy.
- ◆ 19% are living with **high complexity chronic conditions**, and only 6% are diagnosed with **dementia**.
- ◆ This has remained relatively stable over the last five years.

Flu shot

- ◆ 37% of all seniors received the **publicly funded flu vaccine**; an increase from 34% vaccinated in 2017/18.
- ◆ **Vaccination rates for seniors** ranged from a low of 26% in Vancouver Coastal to a high of 49% in Interior Health.
- ◆ 87% of **seniors residing in long-term care** and 74% of the staff received the publicly funded flu vaccine. This is a minor increase for residents and minor decrease for staff.
- ◆ 69% of **home support clients** were vaccinated.
- ◆ Overall, an estimated 15-20% of the population received the **public flu vaccine**.

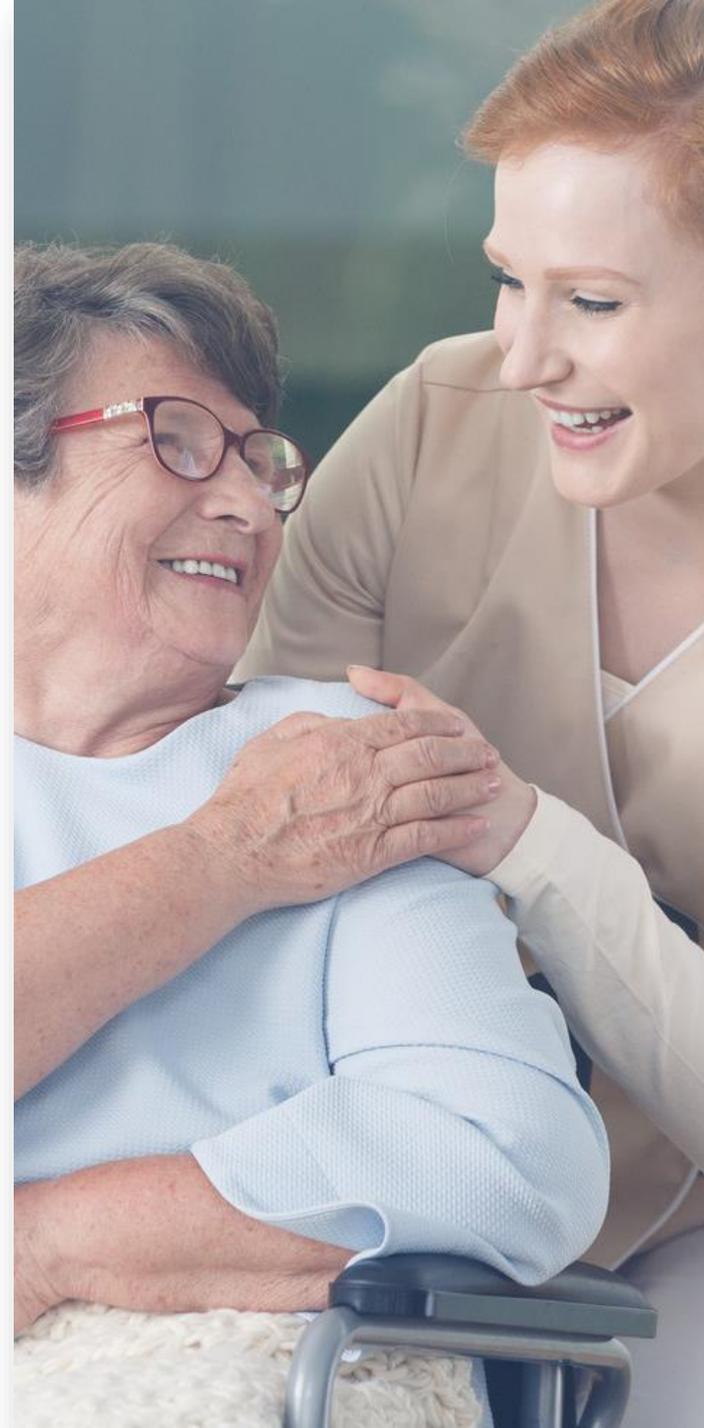

Healthcare Highlights

Hospitalizations

- ◆ 26% of **emergency department visits** and 44% of hospitalizations were for seniors. This has been slowly increasing over the past five years.

Home support and care hours

- ◆ **Home support** clients increased 1.7%, however this is due solely to **short-term home support clients** who increased 5%, while **long term home support clients** saw a minor decrease of less than 1%. The target population of 80 plus grew by just over 3% during this time.
- ◆ Average **hours of care delivered** decreased 1.4% to 198 hours per client per year – the lowest in three years. However, this was driven by a decrease in the **average hours for short-term clients** which decreased 2% while long-term saw a minor increase of less than 1%.
- ◆ **Home care complaints** increased 17% and has been increasing steadily since 2015/16.
- ◆ There was a 10% increase in **adult day program** clients and a 1.5% decrease in the **wait list**.

Healthcare Highlights

Assisted living

- ◆ **Subsidized registered assisted living units** and the **number of clients** living in those units decreased by 1%. This is a decrease for the second consecutive year. Currently, the waitlist for subsidized assisted living represents 20% of the total available units.
- ◆ There were 877 reportable incidents in **assisted living**, a 60% increase over last year; 75% of these were falls.

Long-term care

- ◆ **Long-term care beds** have increased only 2% from 2015 to 2019 while the population aged 85 or older grew 13%.
- ◆ The **waitlist** for clients still waiting for admission at the end of 2018/19 grew by 28% but is less than what it was at the end of 2014/15.
- ◆ On March 31, 2019, there were 1,780 on the **wait list**, compared to 1,379 the year before; although, in 2015 there were 1,798 on the waitlist.
- ◆ The **standard of admission** within 30 days was met for 67% of admissions in 2018/19; this was down from last year (70%) but up from 2014/15 (64%).
- ◆ There were 18,007 reportable **incidents** in long-term care, a 3% increase over last year.

Healthcare Highlights

Human health resources and active registrants

- ◆ In 2018/19, the number of **active registrants** increased for all professions listed, except for **registered nurses** which had a very slight decrease.
- ◆ **Licensed practical nurses** (16%) and **care aides** (7%) increased the most this past year.
